

LET US BE YOUR

TURNKEY BESS DEPLOYMENT TEAM

Program Management, Transportation, Precision Rigging, & EPC Installation
Aligned from Delivery to Energization

**DMK
Project Solutions
Services**

Expert program leadership and turnkey oversight

For organizations scaling their energy storage capabilities, DMK Project Solutions Services provides a specialized delivery framework designed to manage the high-stakes integration of Battery Energy Storage Systems (BESS). Leveraging a deep background in mission-critical data center development, DMK acts as the central nervous system for complex power projects.

Honeywell

Energy Solutions and Integration

Honeywell is involved in Battery Energy Storage Systems (BESS) and data centers by providing innovative energy solutions that help optimize energy usage and enhance operational efficiency. They integrate advanced technologies to support sustainable energy practices and improve the reliability of data center operations. Through their energy and sustainability solutions, Honeywell contributes to reducing emissions and promoting energy transition in various sectors, including data centers.

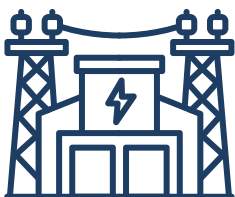

Engineering, Procurement, and Construction

APG, Inc. serves as the premier EPC partner for BESS deployment, delivering expert engineering, procurement, construction, and system integration. Their specialized teams lead every phase of electrical integration and installation to ensure critical power infrastructure is seamlessly connected. Each system is fully commissioned to guarantee high-performance operational readiness from day one.

Equipment handling and rigging

AK Industrial Contractors, Inc. specializes in heavy equipment handling and industrial rigging to ensure the precision placement of BESS containers and supporting infrastructure. Their experienced field teams manage the entire logistical chain, guaranteeing that every asset is safely installed within complex site environments. This expertise in specialized transportation and placement provides the foundational stability required for long-term operational success.

Precision BESS Deployment for Powering the Future

By combining DMK's program leadership, AK Industrial's rigging expertise, and APG, Inc. installation and commissioning capabilities, this partnership delivers a streamlined approach to BESS deployment that minimizes risk, improves efficiency, and ensures systems are ready to support the next generation of data center power demands.
